

SOULMATE COSMOLOGY AND THE ELOHIM STARFLEETS

Dr. Henry C. Monteith
henrymonteith@att.net

Everything written below is from the point of view of our personal cosmology. It is not intended to be true for anyone else reading it, and we are most certainly not attempting to convince the reader of anything whatsoever. Even if we desired to do so, it is impossible; because one person can never transfer his understanding to another! It is for you to prove or disprove according to your ability to expand your consciousness. You are a Microcosm, created to view the Cosmos from your own unique point of view; therefore, if you wish to experience the indescribably joy and happiness of knowing who you are, where you came from, and where you are going, you must develop your personal cosmology from scratch to the level of awareness where you feel the wondrous bliss of being at One with The Consciousness of Energy! Remember, 'right' and 'wrong' are dual aspects of the same thing! Arguing between them is useless, because one cannot exist without the other; it is for you to choose which side you will physically realize and which side you will leave unfulfilled in your unconscious mind where it must eternally serve as a reference!

THE GLORIOUS DESTINY OF MAN

In the beginning of all creation, first came a thought form from our supreme One, or Creator. This form spread through the cosmos and burst with a shining reality into being; from this came all that is and ever shall be. A thought clothed in love and beauty, bearing the essence of all consciousness from the beginning of that known as time, to that which is understood to be eternity. This thought, manifesting on all planes of vibration, sweeping in ever expanding cycles of consciousness and awareness, permeated the fabric of that known as matter, and lo, life had its beginnings. Not all consciousness started at the same level in the beginning, many subdivisions, many groups of a kind, raised their glittering spirals of consciousness, upwards and outwards in an ever ascending spiral, and amidst these various forms of creation, there came that known as Man.

Man, unenlightened, grouping about in the mist, but ever feeling an underlying pulse, a deep current, or surge of that finer thread, linking him back through all

of time and space, to his Creator. Man, setting forth, wandering through the mist of eternity, reaching ever upwards and outwards and gradually sensing the light permeating all that is about him and reacting to those subtle nuances as his expressions and experiences began to filter into his consciousness.

Throughout all time, and on all planets, that which is man is common in thought, in shape, and in essence, a thing of beauty. And now we see man, traversing the corridors and pathways, up through time, evolving and experiencing.

Our Creator, in all awareness, gave that part of His creation, known as Man, that known as Woman; woman, the higher intuitive and inspirational counterpart of man, his dual polarity or soulmate so that expression might evolve on a balanced basis: One phase feeling the galvanization of masculinity, the other the allurements of femininity; for like all forms of creation, Man must be a balanced creation, growing and experiencing in a way fore-ordained, so that in his path, greater events of magnitude might confront him for his observation.

Now let us look at man, in his present state, upon your planet, the earth. We see a man who is slightly confused, knowing the touches of great joys and harmonies at one instant and of frustration and bitterness at another. Yet, if we look closely, if we look within that known as his heart, we see a tiny silver thread, which grows with ever increasing brilliance, for man, regardless of his nature, of his outlook, regardless of his beliefs, can never separate himself from his cosmic destiny. He may deviate from the path, he may branch off the path he knows is his, but his journeys will not be allowed to stretch too far afield.

There comes a time, in every experience of this relationship called life, when this that is called Man looks inward. When he finds dissatisfactions present in his outward environment, and when he looks within he cannot help but notice that which had clothed him from the outside. Instead, he sees an essence, a reality that truly is, he sees beauty and light, grandeur, and omnipotence.

And now, we look forward. We look forward to that which man will become in the eons stretching before him. We see truly a man liberated, experiencing that thing called freedom and knowing an awareness with all that is, sensing this thing called love. And beyond this, we see man, whose shackles of

incompetence, and of limitations, of identity, have been cast loose, and in its place we see awareness and at oneness. If only, my brothers and sisters, you could witness from our vantage point, that which lies ahead and in store for your people. The heritage of this thing, this creation called Man, stretches into boundless depths, of not only this universe, but those that lie beyond. For gradually, as man ascends this ever tightening and ascending spiral, he senses that from which he sprang; he feels with great love and great longing the original thought which was his creation. And then, man slowly undergoes the transformation, his cycles of existence, no longer known as life, become cycles of being. He transcends all that is known of physical matter and enters into boundless eternal regions known only to those who inhabit them. And again, he becomes a God within a God, a thing of majesty, a ray of light, charging his way through interwoven universes while during his progress, he touches one planet after another. There, my brothers and sisters, we shall leave this creation called Man.

THE STARLIGHT UPON AWAKENING

Perhaps it is only coincidental, but a very shocking and inspiring event, that initiated my lifelong research into UFOs, occurred in 1947, which is the very same year that the most famous of all UFO events happened in Roswell, New Mexico. Then I was only a small ten year old boy growing up on a rural and considerably isolated farm in Columbia, South Carolina.

I had never heard of Cosmology; yet, I felt that I was traveling among the stars; I knew nothing of conscious living beings beyond the people and farm animals around me; nevertheless, I found myself praising the Glory of Cosmic Oneness with highly intelligent Beings of unspeakable evolutionary accomplishments. I know now that it was not delusional; and, most certainly, it was not the result of an over-active imagination because it set my heart, mind, and spirit upon a most sublime action path of life that has led to the fulfillment of an indescribably wonderful destiny!

My entire career of discovery, which deeply inspired the evolution of my spiritual consciousness, has been precisely and eloquently guided by the Absolute Law of Cosmic Oneness. In a paper which I presented at the 1980 MUFON UFO Symposium with the title: *The Unified Field Theory and the UFO*, I began with the following statement:

To any reasonable mind, it appears logical to assume that The Universe is One. The concept which concerns the oneness of all things is a common thought in all religious, philosophical, and scientific theses which have been produced throughout human history. The spiritual essence in man appears to urge him onwards; forever inspiring him to seek out and verify the ancient truth that all is, indeed, One.

Einstein consumed his entire life in the pursuit of Cosmic Oneness and numerous inspired theoretical physicists today are dedicating their lives to reaching this goal through the recently conceived Super-String Theory and Quantum Gravity Theory. Therefore, it appears that the time is rapidly approaching when the consciousness of all mankind will once again become aware of the awesome reality that **all things which are bounded and perceivable, and all things which are unbounded and unperceivable, are timelessly and characteristically united as One, and the Absolute One is systematically and eternally expressing Itself as the Cosmos!**

I obtained a Ph.D. in Engineering Physics, with special emphasis on mathematics, for the sole purpose of developing sufficient capability for comprehending and contributing to the very complex and evolving Theory of Unified Fields. Quite early, during my mental and physical development, I began to realize that there was very much more to the creative action of the Cosmos than just four forces which could be intellectually unified and explained with the language of logical mathematics. After all, the effects of UFO encounters extended far beyond those that were comprehensible to physical science and which could be intellectually explained with sophisticated mathematics!

Indeed, the most dramatic effects, of UFO encounters, involved psychological and parapsychological forces that appear to characterize a world of causes which creatively expresses itself through intuitive and spiritual thought! Now The Absolute Law of Oneness explicitly and implicitly implies that the universe of causes, and the universe of effects, must indelibly be One and the Same. Therefore, the first thing that I had to do, on my journey toward at least beginning to understand all things, was to verify to myself that the Law of Cosmic Oneness was absolute.

To aid me in my journey of discovery, I simultaneously began a life-long study of parapsychology. First, I discovered that the Absolute Law of the Oneness can never be violated. I reasoned that the Cosmos came into being by creating the illusion of Itself as being divided into an Infinitely Countable Many. However, while doing this, the invariance of the Absolute Law of Oneness had to be maintained by making it impossible for any one created entity to isolate itself and become totally independent of all of the others in substance, thought, or action. In other words, the Cosmic Fact that all created entities are intimately inter-related and absolutely dependent upon each other for their very existence is irrefutable proof of the Absolute Law of Cosmic Oneness.

In addition, and to my delight, I also discovered that the theory of dimensions in geometry offers concrete mathematical proof of the Absolute Law of Oneness. When we are conscious of a single point, our thought is confined to zero dimensions. When we attempt to become conscious of two separate points, they join instantly to create a line and our thoughts span one dimension. When we become conscious of a point outside of the line, the line and the point join to form a plane of two dimensions and when we think of a point outside of the plane, the point and the plane join to span a three-dimensional space.

Thus it is impossible to separate a point from a geometrical entity without creating an entity of higher dimension. Consequently, we can only conclude that no two things can ever be separated so that they become dimensionally independent and eternally isolated from each other. While meditating on ‘thought’ and ‘consciousness’ during one eventful day, I suddenly realized the second Absolute Law of Creation which governs the universe of causes that is characterized by intuitive and spiritual thought.

The second law is stated as follows: **Thought calls forth duality; duality reformulates thought; and the action of this vicious circle gives rise to consciousness and awareness.** This awesome law is continually being verified to everyone by every thought that passes through their minds. All that is necessary to prove the law is to make an honest attempt to ‘think’ without being consciously or subconsciously aware of two things, or concepts, that are related to each other by some degree of opposition. In other words, a concept which has no reference point can never be distinguished and even the reference point must itself have a reference with respect to the consciousness that is attempting to perceive the

concept!

For example the instant that you perceive that a thing is beautiful, you are automatically comparing it, consciously or subconsciously, with something you have perceived to be ugly with respect to it. This obvious, but very much overlooked and subconsciously suppressed law, was recognized by the Taoist philosophers very long ago:

When the world points up beauty, as such, there is ugliness too. When goodness is taken as goodness, wickedness enters as well. Hard and soft are complimentary; before and after are a sequence.

The effect of thought is that it projects opposites from a reference point just as the sense of 'positive' and the sense of 'negative' is projected from the reference point denoted by '0' on a line. The environment in which the dual-opposites are projected stimulates the mind to favor the positive and oppose the negative or vice-versus. This then gives rise to the conflict between opposites which forces the generation of additional thought. This is the source of all Cosmic Action and the power that drives the evolution of consciousness.

Meditating further, I was led to the conclusion that **since opposite things are really One, they cannot be opposite in the sense that they are also separate.** Therefore, the only manner in which they can be simultaneously Dual and One is that they are gender conditioned. Thus one must be masculine in aspect and action and its dual must be feminine in aspect and action. I then conceived of the action unit generator as a perfectly matched dual-sexed pair that are strongly bound together by the interchange of gender conditioned energy between them.

Now the most elementary and fundamental structural dual-sexed-pair is that of the feminine proton and the masculine electron. When they join together, and interact with each other, over a mean distance that is equivalent to the Bohr Radius, they create the hydrogen atom which is the fundamental structural component of all matter. When the Bohr radius is reduced to zero, the electron and proton become One and produces a microscopic representative of Oneness by creating a particle, called the neutron, with zero internal action. Using this as an analogy, I set forth the hypothesis that before the Big Bang Illusion, our universe was One with zero internal action and after the Big Bang it expanded as One and generated within

itself an enormous quantity of internal space-time action that was precisely balanced by an equal quantity of internal space-time reaction. This is the origin of Newton's third law which states that for every action there is an equal and opposite reaction. Thus the neutron is a model of the state of the universe before the so-called Big Bang and the hydrogen atom is a model of the state of the universe after the so-called Big Bang.

The masculine electron and the feminine proton are a soulmate pair and when they are separated by a distance that far exceeds the Bohr radius, they frantically search to find each other again in order to reduce their separation to the Bohr radius, where they can interact in harmony and balance, to create the hydrogen atom, which is the structural component of all matter, or bind together at zero separation to create the powerful neutron. Indeed, all soulmate pairs which have been separated by thought, strive relentlessly to find each other again by traversing the paths of least action that divide them. This is why the Principle of Least Action is the fundamental foundation upon which the Unifying Field Theories of Modern Physics have been constructed.

The neutron, being a Neutral One, is representative of the Oneness of the Cosmos. Because of this, it can traverse the entire realm of elementary particles without itself being affected. When functioning in balance with the other nucleons, it helps to keep atomic structure stable; when operating out of balance with the other nucleons, it causes nuclei to be split. Then it came to me, like a lightening flash out of the blue, a thought that had been residing on the boundary between my conscious and unconscious awareness: Suddenly, I realized that I would only be able to comprehend the true nature of our awesome Cosmos by becoming, 'myself', a Neutral One! The only way to do this was to find the person who is my eternal soulmate and who has reached a level of spiritual evolution that is equal to my own. But then, how was I to go about accomplishing this? Indeed, at the time, I had not a single clue.

The Absolute Law of Oneness, and the awesome Principle of Duality, make it a certainty that any conceivable, bounded, and centered entity must have its dual counterpart. Since the Physical Cosmos of Effects is the ultimate gender conditioned entity, that is bounded and centered by the Neutral Action of the Cosmos, It must have a dual soulmate counterpart which is the Spiritual Cosmos of Causes. At the present state of mankind's evolution on Earth, virtually nothing

is known about the Conscious and Living Spiritual Cosmos of Causes and in spite of all the scientific and technical advances that have been made, precious little, concerning the physical cosmos of effects that is of value to the expansion of human consciousness, has been discovered, comprehended, and understood. In fact, over 95% of the timeless Mystery of the Cosmos, that confronts mankind's very limited conscious perception and intellectual capacity, is scientifically inaccessible and; consequently, undiscoverable by any form of physical instrumentation that is confined to four-dimensional space time.

Considering all of these things, I was led to the following inescapable conclusion: The True Theory of Cosmic Oneness can only be evolved by marrying the Feminine Intuitive Arts, which are expressed through the language of Music, with the Masculine Intellectual Sciences, that are expressed through the language of Geometrical Mathematics. Music and Geometrical Mathematics are a perfectly matched soulmate pair which interact harmoniously to generate the precious evolutionary action units of knowledge, wisdom, and understanding.

The intellectual and intuitive mind of the Cosmos, which is centered and bounded by its Spirit, is the embodiment of its Soul. The Spirit of the Cosmos, the Ultimate Cause of all things, is the Essence that is boundless, indistinguishable, and which the intellect can never grasp. It was referred to by the early Jews as 'Yahweh', the Name which was never to be spoken. The Cosmos is Its physical body, the vehicle of Its expressions, through which all of the action processes involving Universal Life are generated.

The microcosm of the human body is just as mysterious and wondrous in its domain of expression as is the macroscopic body of the Cosmos. This is why the physical body of man has been referred to as the Temple of God in the Bible and why the Temple of Luxor was built by the enlightened priest of ancient Egypt to represent it as a microcosm. Consequently, each and every Soul, of the evolving human entity, is just as divine, with respect to its microscopic body, as the Soul of the Cosmos is with respect to its macroscopic body.

In answer to a question that was asked by his disciples, Yeshua (Jesus) answered, in no uncertain terms, as follows:

Is it not written in your law I said, Ye are Gods? If he called them Gods, unto whom the word of God came, and the scriptures cannot be broken; say ye of Him, whom the father hath sanctified, and sent into the world, Thou blasphemest; because I said, I am the son of God (John 10:34-36).

According to the Absolute Law of Oneness, my Masculine Soul, and the Feminine Soul of my Beloved Soulmate, always have been, are now, and always will be eternally at One with the Soul of the Cosmos. The purpose of the creative action of all life is to promote the evolution of soulmate consciousness from the darkness of separateness, and unawareness of their Oneness with themselves and all living things, to the light of eternal blissful awareness of Oneness with each other and the Soul of the Cosmos. Thus, as we evolved separately through the agony and the ecstasy of life's experiences toward finding ourselves, our unconscious memory of each other gradually became conscious.

Thus, the power of our spirits was awakened and immediately they initiated a series of awesome and miraculous events that brought us together in space-time so that we could proceed to culminate our Oneness physically, mentally, and spiritually. As a result of the rapid acceleration in our evolution, that began with our union, our consciousness reached a level of evolution high enough to bring it to the attention of the Cosmic Soul. It then granted us the most awesome gift of gifts, which is the indescribable and priceless right to share Its thought and Cosmic Consciousness.

My profoundly beautiful and adorable soulmate Erika is the ultimate representative of the Feminine Intuitive Arts. She is a highly accomplished pianist who can instantly create music under the direct inspiration of the Cosmic Soul. She is the precise dual complement of my representation of the Masculine Intellectual Sciences as expressed through Geometrical Mathematics. United together in an awesome soulmate embrace, we have finally become a representative of the Cosmic One and, from moment to moment, we are experiencing the bliss of Its glorious Oneness and sharing the endless joy of Its Eternal Evolutionary Thoughts. It is in the Oneness of Its Light that we now present the following to you:

Under the jurisdiction of the Absolute Law of Oneness which is the only Eternal Constraint, and the Principle of Duality, which generates all Cosmic Action,

anything which can be thought can be physically realized, under the control and will of the Universal Soul, because Its thought is the very Essence of the actions of all life in the Cosmos and the creative cause of Its Eternal Being. Therefore when Mankind, abiding in a state of primitive awareness, conceived of the notion that they were alone in the Cosmos, the dual concept, that the Cosmos is filled with intelligent life, had to also simultaneously appear in their unconscious thoughts as its reference!

Human beings, who are still evolving at a very primitive level of spiritual consciousness on earth, well exemplify the allegory that “they are standing on a whale while fishing for minnows!” While searching for signs of primitive life in the Cosmos, with their severely limited instruments of physical science, they are completely blind to the awesome Fleets of Lightships that are carrying out extensive operations all around them to maintain the action environment for their physical and spiritual evolution on earth, to prevent premature collapse of the biosphere, to control the nature and direction of genetic modifications, and to accelerate the intellectual and spiritual development of mankind by shocking their conscious materialistic minds with unexplainable mysterious phenomena such as crop circles, abduction experiences, and a controlled spectrum of UFO interactions.

Mankind’s physical scientists, are telling them that life on earth has always been in great danger of being totally destroyed by the awesome threats which exist around it in space. There is much talk about a huge meteor, asteroid, or comet striking the earth and sending all life back to the stone age or destroying it altogether. Nevertheless, in reality, the evolution of life in the Cosmos is under the complete control of THE BOUNDLESS COSMIC ESSENCE (BCE), through Its representative God the Cosmos, and the ‘accidental’ destruction of life on any planet, that It has ordained to support it, is not possible! There can be no life without death, no creation without annihilation; indeed, all action is cyclic, ALL IS VIBRATION! Wonderfully and mysteriously, however, vibration is controlled by CONSCIOUSNESS!

The Cosmos is not a game of chance and indeed, as Einstein said, “God does not throw dice!” However, due to the evolutionary and involutory action of Microcosmic Mankind (the Elohim Gods), expanding their consciousnesses in every possible way on the Cosmic Scale, the COSMOS can be considered as a

‘Game of Choice’ which takes place in the timeless scale of the ‘Eternal Now’ and this is what, to the materialistic consciousness, makes the Cosmos appear to be probabilistic in its evolutionary unfoldment! Mankind, evolving at the level of materialistic consciousness on earth, has already been given a great deal of evidence that is sufficient to verify to them that the Elohim Gods are protecting their beautiful Earth Mother. A very special example of this has been recorded as follows:

On November 1, 2002, in Turkey, several pilots watched in awe as a Light Ship of the Elohim destroyed a meteor which would have wreaked devastating havoc on earth had it been allowed to hit (www.siriusufo.org). The Elohim mercifully dissipated it and; thereby, rendered it ineffective. In addition, many of the UFO sightings that have been occurring around the world are of Light Ships that are serving as doctors to the Earth Goddess and they have been patching up some of the serious wounds that mankind has already inflicted upon her. Therefore, those who are responsible for guiding the spiritual evolution of mankind on earth are not going to allow them to harm their Earth Mother beyond recovery. However, It has allowed mankind’s desecration to push earth’s biosphere very close to collapse because only by experiencing the painful consequences of abusing the earth, can mankind learn to love all life, treat it as sacred, and become one with it in perfect balance and harmony.

The freedom of choice allowed, under the laws which control the spiritual evolution of mankind on earth, is wide ranging; however, it is not unbounded. For example, if a nation, or radical group, makes the deadly choice of starting a nuclear war on earth, the guardians will analyze the situation and decide to interfere, or not, depending upon what effect the nuclear war will have on the spiritual evolution of mankind. On the other hand, if any nation now, or in the future, tries to put nuclear weapons in space, they are going to be stopped immediately because it is absolutely forbidden!

This was made clear to both Russia and the United States during the cold war when UFOs temporarily shut down missile silos in both countries. The firing of any missile that attempts to put a nuclear weapon in space, will result in its immediate destruction! If you don’t believe us, then try it! The internet is filled with testimony which supports this. Most of the spacecraft that are carrying out operations on earth are invisible because they are coming to and from the earth by

using earth's "Parallel space"! Every planet has a parallel world to itself and there are enormous motherships right now orbiting planets in our solar that are completely invisible to all of earth's telescopes!

The Solar System, of which earth is the life-giving member for mankind, is the physical embodiment and vehicle of the evolutionary expression of its Sun-God and Earth Goddess who are themselves very highly evolved Gods of the Elohim. In effect, earth's Solar System is a huge spaceship which is manned and controlled by the Gods of the Elohim and they are 'timelessly' carrying out their mission of creating life and evolving it physically, mentally, and spiritually from the darkness of Unconscious Separateness to the light of Conscious Oneness. The Sun created the vehicles and the biosphere for the evolution of mankind's spirits on earth and it is their intimate connection to the eternal Cosmic Mind which is timeless and everywhere. The existence of the ever present nature of the living and evolving Consciousness of the Cosmos, was suggested by Jesus to his disciples when he made the following statements:

If those who lead you say to you, "See, the Kingdom is in the sky," then the birds of the sky will precede you. If they say to you, "It is in the sea," then the fish will precede you. Rather, the Kingdom is inside you, and it is outside of you. When you come to know yourselves, then you will realize that it is you who are the sons of the living Father. But if you will not know yourselves, you dwell in poverty and it is you who are that poverty

(The Doctrine of Thomas (3)).

In the Doctrine of Thomas (113) His disciples said to him, "When will the Kingdom come?" Jesus said:

It will not come by waiting for it. It will not be a matter of saying 'Here it is' or 'There it is.' Rather the Kingdom of the Father is spread out upon the earth, and men do not see it.

For obvious reasons, the Thomas Doctrine was not included in the Christian Bible. It is often being said that the governments of the world are hiding the solid proof that UFOs exist for many selfish reasons, not the least of which is national security. For a complete discussion of this please read ***Understanding UFO Secrecy*** by Steven M. Greer, M. D. However, it would be impossible for the

security agencies of the world's governments to keep the reality of UFOs secret if the majority of the people were demanding full knowledge of them.

The fact is that the majority of the world's people have still not evolved very far spiritually. Since they have been kept in ignorance, and have not been encouraged to accelerate their mental and spiritual evolution, they have become quite apathetic. Consequently, their only option has been to devote all of their attention to making themselves feel physically and economically secure, and continuously seeking to find happiness through their fixed and materialistically dominated political and social institutions.

The purpose of the book *Soulmate Cosmological Action*, by Dr. Henry and Erika Monteith (www.soulmatecosmology.com) is to help make the people of the world acutely aware of their place in the Cosmos, their evolutionary responsibilities, and to realize the awesome fact that the entire Cosmos is alive and filled with the Light-ships of the Elohim. The book encourages the people of the world to please stop consuming their minds on materialistic trivia and begin devoting themselves to studying, mediating upon, and physically expressing, the feminine intuitive arts and the masculine intellectual sciences. In this manner they will gradually evolve towards Oneness with their Soulmates and ultimately experience the awesome bliss of Cosmic Consciousness. Those whose spiritual awareness is now sufficiently evolved to accept the reality of the Elohim Lightships should become familiar with the following events which conclusively prove their existence:

On Wednesday, May 9th, 2001, over twenty military, intelligence, government, corporate and scientific witnesses came forward at the National Press Club in Washington, DC to establish the reality of UFOs or extraterrestrial vehicles, extraterrestrial life forms, and resulting advanced energy and propulsion technologies. The weight of this firsthand testimony, along with supporting government documentation and other evidence, will establish without any doubt the reality of these phenomena, according to Dr. Steven M. Greer, director of the Disclosure Project which hosted the event.

www.disclosureproject.com

Due to the lack of sufficient spiritual evolution on the part of most reporters, this press conference was not accepted with open arms. Indeed, it was largely ignored by all of the popular news broadcasters such as NBC, ABC, CBS and CNN. At

best, it was mentioned only briefly on the side, never thoroughly discussed, and never subjected to thorough analysis by commentators

Widespread UFO sightings, have been occurring in Mexico since the early 1990s. There have been many mass sightings, with hundreds of people observing the Light Ships of the Elohim at the same time. Thousands of photographs and video tapes have been taken. In sharp contrast to Americans, the Mexican people have accepted UFOs as real and they are being thoroughly studied at the university level. Jaime Maussan of Televisa Mexico, host a television program, that is similar to 60 Minutes of CBS, in which he is continuing to report extensively on all UFO activity and studies that are going on in Mexico and South America. In this respect, the people of Mexico are more spiritually aware than the people of the United States. The American press remains strangely silent on these matters!

The most important contacts, that have been taking place over the past 20 years, with the Light Ships, have been occurring in Mexico. In particular, a DVD has been made of the spectacular experiences of Carlos Diaz with the Ships of Light as he refers to them. He has taken the very best color photographs and movies of the Elohim Ships of Light that have ever been produced. From these photographs, scientists at the University of Mexico have verified that the energy field around the Light Ships is a type of living plasma; in other words, the ships are, for all practical purposes, Living Beings. Of course, the entire Cosmos is living so it is not surprising that the vehicles of the highly evolved Elohim would be composed of living plasma that radiates the Light and Love of The Cosmic Essence.
(<http://hesemann.m-nd.com>)

The following is an occurrence in the history of UFO encounters which will, perhaps, be historically considered as the most sinister example of intentional blindness which the human race has ever perpetrated upon itself in all of recorded history: In July 1988 the Russians launched two probes in the direction of Mars which they named Phobos 1 and Phobos 2. Phobos 2 beamed back some images and was then lost under certain very intriguing circumstances. Phobos 2 aligned itself with the Martian moonlet Phobos and took a most remarkable photograph. Russian astronaut and pilot, Dr. Marina Popovich, brought this photograph to the Russian consulate in San Francisco in December 1991 and called a news conference.

She presented the press with the last transmission from Phobos 2 which was a photograph of Mar's moonlet, Phobos, together with a huge cylindrical cigar-shaped mothership parked directly beneath it. **Russian scientists had estimated the space-ship to be approximately 20 kilometers long and 1.5 kilometers in diameter which means that it is about 1 mile wide and 13 miles long!** (See Figure (1)) Dr. Popovich stated that immediately after Phobos 2 had taken this photograph, it mysteriously disappeared and, according to the Russian Scientists who studied the event, "it was deliberately destroyed, perhaps by an energy pulse beam"! This is a small mother ship when you consider the fact that the larger ones can be several thousand miles long!!! The Admiral of this small ship allowed it to be visible to the Russians because he knew that they would publically release it as they did.

This was absolute proof of the existence of highly evolved, space-traveling life in the universe. It has been stated, by mankind's scientific visionaries, that the discovery of advanced life in the universe would be the greatest discovery of all time; however, when they were directly faced with the evidence, it was met with complete silence and dismissed out of hand!!. This fantastic event never made front page news in America; indeed, not a single one of America's major news broadcasting agencies gave it the urgent, exciting, and thorough coverage that it most certainly deserved. Indeed, the news should have been alive with it for months and every mind on the planet stimulated to re-evaluate their history, their mythologies, the nature of their universe, and mankind's place in their awesome Cosmos.

Instead, the great discovery was totally ignored and even so illustrious a space scientist as Carl Sagan, did not even give it a brief mention; this, in spite of the fact that he was most certainly intimately involved with the Phobos mission. The silence itself speaks volumes!

This is an exact duplication of the manner in which Galileo was treated when he announced his discovery of the moons of Jupiter and attempted to convince his contemporaries of the reality of these facts. Galileo set up his telescope in the square and invited all those around to look through his telescope and see the moons for themselves. Not a single person dared to even look through Galileo's telescope! Finally, Galileo picked up a dog and placed his eyes to the telescope. A bystander asked Galileo: "why did you do this?"; Galileo answered: "so that it

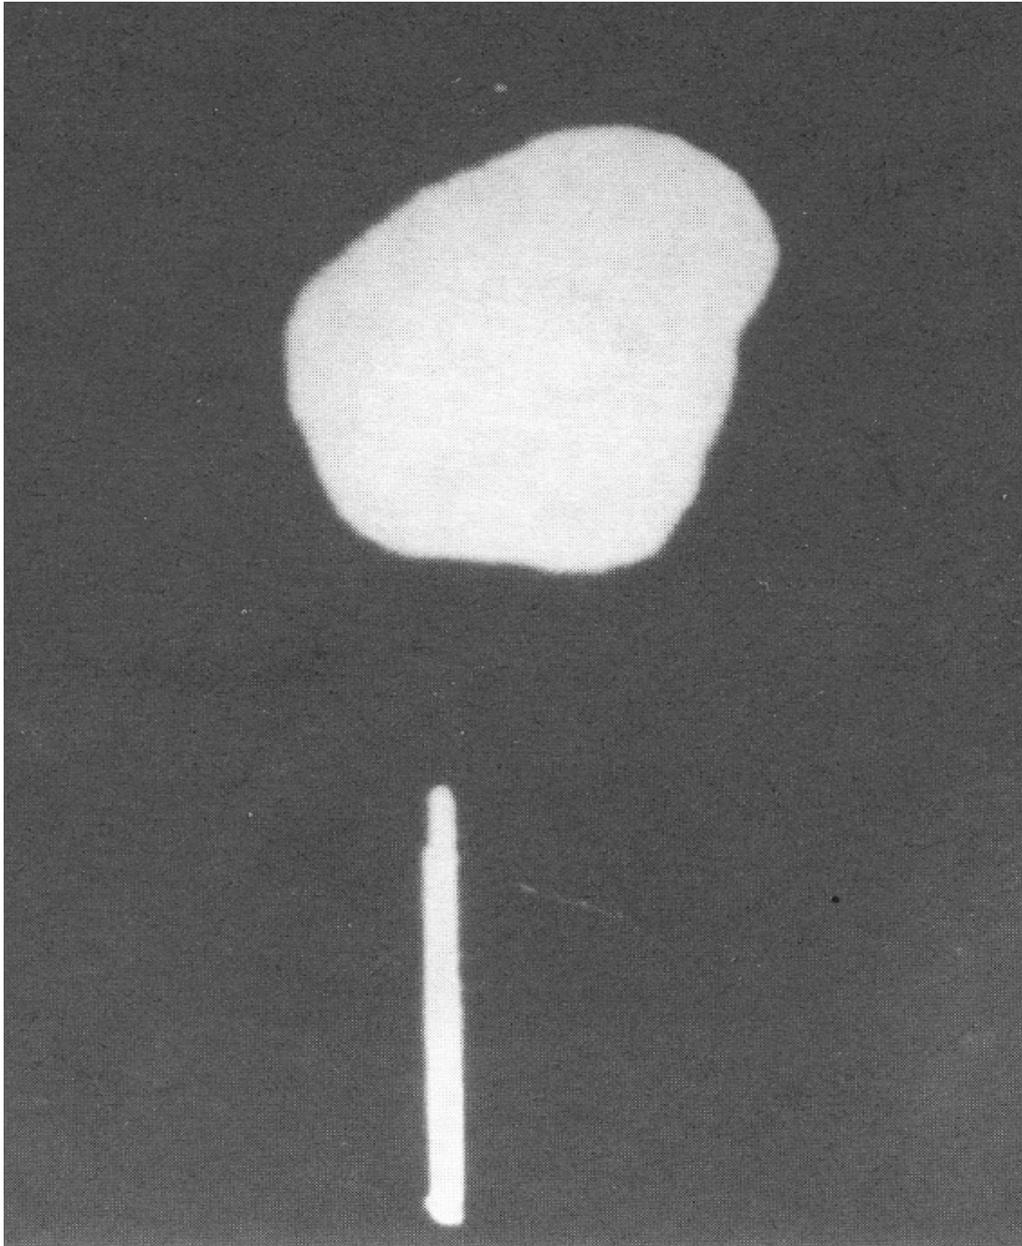

IMAGE ENHANCEMENT OF THE MOTHER-SHIP

Figure (1)

can never be said that not even a dog would look through my telescope!" In the same way, everyone who looked at Dr. Popovich's photograph immediately blinded themselves psychologically because it was impossible for their primitive mythologies to prepare their conscious minds to accommodate the existence of highly intelligent living beings operating at evolutionary levels which far exceeds their own.

There is great fear, within both religious and government institutions, that the tremendous change in awareness, which will occur when everybody on earth becomes conscious of the awesome expressions of intelligent life in the universe at large, will cause them to lose physical and mental control of the people as they begin to perceive them as irrelevant; however, this is exactly the kind of change in awareness which is now being required of mankind by The Boundless Cosmic Essence.

Indeed, there are none so blind as those who deliberately refuse to see. The unescapable fact that each every soulmate pair must contribute their uniqueness to the evolution of the Cosmic Spirit by developing their personal cosmology and consummating the bliss of their Oneness, is the ultimate fulfillment of the desire to achieve a personal relationship with God.

You can never appreciate the value of anything which is outright given to you without having experienced the painful agony and the joyful ecstasy that is required of you, by your natural environment, to earn it! The reason is that the real reward which you achieve, by earning the things you desire, is the evolution in spiritual consciousness that takes place through the experiences of life that you encounter while earning them. Therefore, it is an eternal law that nothing, in the Boundless Domain of Eternity, is ever going to alleviate you of your evolutionary responsibilities. Consequently, it is absolutely impossible for a spiritually evolved soulmate pair to transfer the bliss of their Cosmic Oneness to another.

The sublime fact that each and every soulmate pair must uniquely achieve the awesome gift of Cosmic Consciousness, by evolving through many incarnations of experiencing the agony and the ecstasy of life, which is accentuated by the illusions of dreadful pain and frightful death, is the ultimate expression of duality compounded by diversity. **For diversity is a foundation stone of the creative forces of Nature; indeed, it is only through diversity that the experiences**

generated by the effects of the action-forces of duality can be maximized and the evolution of Consciousness reach its pinnacle through the development of Cosmic Awareness and The Eternal Bliss of being at One in Thought, Action, and Love with all things that are Centered and Bounded by the Awesome Light and Love of The Boundless Cosmic Essence.

SPIRITUAL MESSAGE FROM A LIGHT SHIP

When, and only when, the people of earth have realized the significance of their being will they gain control of their lives and abilities and accept all of their true existence with the stillness or what they call peace within.

Many of those visiting earth, from other realities, have been making a true effort to uplift mankind's spiritual awareness and to help him open his mind and body to the truth that **he is only limited in his evolvement in this form by preset mind patterns and they are nothing more than illusions.** The fact that UFOs exist or might exist should be enough even in a state of illusion to make the mind aware that there are no limits put upon their life forces or any other life force.

Example: Logic tells us this: they say here God is all power and they have no control or power. Yet in what is called God's book of learning (the Bible), there is from this all powerful God a direct command which states: "Thou shalt not kill". Logic tells us that if you had no power of your own and since this was set upon you as a direct command, by the all powerful God, then you would be limited in action and could not kill no matter how much you might want to or how much effort you put forth.

Now realize that since man has a choice and is powerful enough to oppose the power of God, and a direct command of God, then when working with the natural forces in truth and with direction from that force, he is unlimited as God is unlimited because all the power and force of the universe is in motion with him and ushers him onward. He no longer need struggle as he is not in opposition with his own forces or those about him; not even those preset conditions, patterns, and illusions because he will rise above, see the truth, and be an observer of them but not involved in them or aiding in creating them. Thus man becomes unlimited.

Mankind, on planet earth, has thus far taken the words from the God book and said it contains all that he can and cannot do, should and should not do and then has set his entire existence on this planet into a motion for doing and limiting himself to only the things that it says he cannot or should not do.

If man did not contain the power of this creating force within him he could not even think of opposing that force or acting upon those thoughts because it is that power that gives him power of thought and ability to project. The power of the spirit and all creating forces lie within all life forms but it is the confining, opposing, and limiting it, in the illusion of preset conditions, that is the cause and effect upon the life forms of this planet.

When mankind, in this state, sees something new to him in the natural forces, the first thought of his is how can I create a wonder by making it work for me rather than how can I, having power of flexibility, work with this natural set motion, without upsetting its balance or direct power of its motion, so that we may create together as a unit. Agony is all that man can expect in his present frayed condition.

We only in our continual journey onward, forever seeking more knowledge (yes even such knowledge as how and why forms of spirit evolve in the manner they have on this planet and for a part of our own uplifting attempt to communicate the unlimited power of the universal forces).

We wish not to interfere, or direct, but only that man recognizes the spirit within himself and begin to evolve in the manner led by truth from his own soul. **As the men of earth continue to agonize the spirit within and natural forces around themselves, the greater their limited conditions become. The broader their knowledge the more narrow their minds and spirit, the more technology, the more limited motion.**

Motion does not stop they have only to begin their own in response to it at anytime. As it cannot regress or be suppressed so the motion begun by man cannot be regressed or suppressed. Agony is unbalance and friction caused by waiting and creating a painted limited form of fleeting destruction; indeed, it is only a fleeting moment because the universal motion will continue during and after his destructive acts to self; and in time, its natural flowing force will bring

about its balance. However, the earth need not experience this destruction at all and could remain in a state of readiness for those to come.

It is time for the men of earth to seek beyond the five senses. The fact that we have presented to them thousands of times the possibility of becoming visible and invisible and that the best way is not to travel through great distances in space but to avoid distance altogether. This way should inspire man's spiritual growth and limitless activity in his present form. That they are not alone, never have been and will not be. We are uplifted by learning of them, may they be uplifted by learning of us. **Do not tell them these things as an absolute truth but in a manner of its possibility as, indeed, all things are possible.** There will be those who reach within and find these truths having heard of it, however, agony will await those who do not awaken as they will force their spirit to serve in like conditions created through the illusions of their ignorance.
